CHELA

Chela Ltd is an industry leading manufacturer of specialist cleaning chemicals and maintenance solutions. Chela can offer an innovative, comprehensive range of rail based cleaning solutions. As part of the rail range of cleaning solutions, Chela can offer a comprehensive range of effective Ballast cleaning and maintenance solutions

BioChela Dissolve

High Performance Biological degreaser for Ballasts

BioChela Dissolve is quick acting and effective in removing petroleum based oils and greases. BioChela Dissolve, inoculates oil and grease based stains with micro-organisms which works to degrade the contamination. Essential micronutrients stimulate this action. In this way, BioChela will remove stains imbedded in porous concrete, stone, asphalt and soil as well as non-porous surfaces.

- Proven to clean Ballasts
- Removes stains ordinary products cannot
- Keeps working on imbedded stains
- Deals with surface stains
- Biodegradable
- Enhances biodegradation above and below ground surface
- Cleans oily plant equipment, vehicles and tools
- Solvent free
- Micronutrients boost activity

Guardian Masonry Protector

Effective coating treatment to reduce ballast dirt build-up

Penetrating oil, stain and dirt repellent for masonry, brick, concrete and ceramic tiles. Is easy-to-use, water based, has a low VOC and a low odour. Its protective treatment will improve the cleanability and stain resistance of masonry floors including limestone and marble. It may be used on both interior and exterior surfaces. Treated surfaces will resist staining from general grime, oil, food and waterborne matter whilst retaining their natural colour, appearance and breathability.

- Saves costs: Anti-stain - reduces amount of cleaning chemical required.
- Economical to use -long lasting.
- Saves time: subsequent cleaning is quicker as soiling is easy to remove.
- Highly effective - helps resist staining from: motor oil, hydraulic fluid, grease, chewing gum, ketchup, cola, wine, juices, vegetable oils and animal greases.
- Protects reputation: improves appearance of floor.
- Will not make the surface slippery: non film-forming.
- User friendly: Low odour water-based.
- Low hazard under EU legislation
- Non-flammable
- Low VOC less than 400 g/l

Railway Trackmats

Effective Protection for Ballasts

Railmats provide a quick and safe method of preventing contamination of track ballast along a rail line.

The Railmats feature an extra thick oil selective absorbent sheet which repels rainwater. The railmats are available in different sizes to suit your requirements. For more information on the railmats please see product specification or contact a member of the Chela sales team
