ClearShield

What Is It?

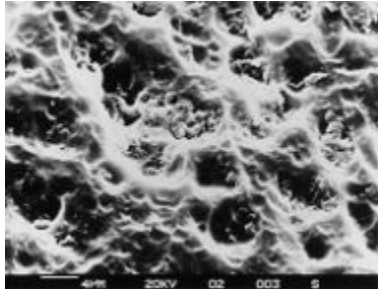

The multi-award winning ClearShield System has been specifically developed for protecting and maintaining glass surfaces. Unique solutions for renovating glass already installed are also available. The innovative System offers customized solutions to all glass users.

ClearShield, the protective element in the System, works like 'non-stick' cookware onto glass surfaces.

What does it do?

Keeps your glass looking like new
Always easier to clean
Resists staining and discoloration

Why ClearShield

The Problem: Glass Corrosion

Just as metal rusts, glass suffers corrosion. This is caused by exposure to its environment as well as the physical and chemical properties of glass.

While glass may look smooth, it actually consists of microscopic peaks and valleys.

Depending on the type of environment, such as showers, decorative, architectural, windows/sunrooms, marine and airports/train stations, different contaminants fill these valleys and chemically react with the glass, firmly bonding to the surface.

The Solution: ClearShield

ClearShield Low-Maintenance / Easy Clean Glass prevents contaminants from bonding to the surface and limits further damage caused by corrosion and chemical attack. Glass can be kept looking like new and easy to clean using normal cleaning methods.

ClearShield forms a strong, multi molecular bond on the surface of the glass.

This unique polymeric resin provides years of proven protection.

ClearShield creates Low-Maintenance / Easy Clean Glass.
