CHELA

Chela ScentFilm

ScentFilm™ is an innovative product constructed from a carbon embedded nano-permeable sachet which contains a scented gel. The scented gel is formulated based on proprietary gelation technology and consists up to 97% of essential oil blends.

ScentFilm™ is inserted directly into diffuser air vents, Air Handling Units (AHU) or Fan Coil Units (FCU) and only utilizes air currents to diffuse scents into enclosed spaces. For use in AHUs and FCUs, a cage like box is recommended for containment of the ScentFilm™.

It is designed for use in commercial venues where it is being used to improve the ambience of an indoor environment and well-being of its occupants.

ScentFilm™ is compatible with most air-conditioning systems and is the most appropriate solution for use in environments where mechanical installation is prohibited and where invisibility is required, such as retail spaces and lobbies of commercial establishments.

unique features

- Last up to 4 weeks (subject to operational conditions)
- Invisible upon application
- No power supply or burning candles required
- No equipment or mechanical installation required
- No maintenance required
- No harmful aerosols and solvents
- Safe, convenient & environmentally friendly
- Conforms to the safety guidelines of IFRA

Chela ScentFilm AC

ScentFilm™ AC is another innovative product constructed from a carbon embedded nano-permeable sachet which contains a scented gel.

The scented gel is formulated based on proprietary gelation technology and consists up to 97% of essential oil blends.

ScentFilm™ AC can be placed on top of cabinets or hidden away on wall ledges. It only utilizes air currents to diffuse scents into small enclosed spaces. It can be used in both commercial venues and domestic spaces, where it is being used to improve the ambience of an indoor environment and well-being of its occupants.

ScentFilm™ AC is compatible with most air-conditioning systems and is the most appropriate solution for use in small environments where mechanical installation is prohibited and where invisibility is required, such as lifts, hotel guestrooms etc.
