

# DIGESIL DEBOND MIL

A mixture of solvents with surfactant and inorganic thicker so that it clings to vertical surfaces.

Debond MIL is designed to remove silicone elastomer and rubber from paint, plastic and metal surfaces.

Debond MIL penetrates the silicone film causing it to swell and detach from the substrate. Any residues can be removed by swabbing with DeBond MIL thin.

## PRODUCT ATTRIBUTES

- ◆ Quick and easy-to-use
- ◆ Low hazard - replaces dangerous solvents
- ◆ Thickened to cling to vertical surfaces
  - ◆ Lifts silicone from the surface
    - ◆ No mess
    - ◆ Water rinsable

## METHOD

Apply to the silicone with brush or spray. DeBond MIL can be left without agitation for 15 min to 1 hour (5mm Thick Silicone) Using a scraper or pressure washer, remove the loosened silicone. Remove any residues by swabbing with DeBond MIL thin. Rinse with water.

NB do not allow DeBond MIL to dry. Keep wet by application of more DeBond MIL
