## Packing and Shipping Information

Digesil® Gel is classified as non-hazardous for transport. It is available in the following container size: 25 Litre

Type of container	Net weight (kg)	Gross weight (kg)	Size (mm) (h x d)
25 l steel	21.5	23.8	473 x 273

## Specification

Appearance:	Gel
Colour:	Brownish
Odour:	Acrid
S.G.:	0.86

## Hazard Identification

Risk & Safety:	Irritating to eyes and skin.
Hazard Symbols:	Xi

## First-aid Measures

Inhalation:	Move the exposed person to fresh air at once. Get prompt medical attention.
Eyes:	Irrigate with water for at least 15 minutes and seek medical attention .
Skin:	Wash contaminated area with soap and water. Seek medical attention promptly if irritation persists after washing.
Ingestion:	Do not induce vomiting. Rinse mouth thoroughly. Drink plenty of water. Get medical attention immediately.

Consult the Safety Data Sheet for full Health and Safety information.

## Digesil® Gel

**Digesil® Gel is a silicone “digestant”, formulated to remove silicone-based sealants and adhesives and overspray of silicone water repellents, coatings and release agents. Digesil® Gel is formulated to a gel viscosity for application to vertical surfaces and to help control drips and runs for precision applications.**

## Benefits of Digesil® Gel

- Quickly dissolves cured silicone
- Leaves silicone free surface
- Chlorinated and fluorinated solvent free
- Negligible aromatic solvent content
- Environmentally responsible
- Low odour for operator comfort
- High flash point for safety
- Low density for ease of handling
- Rinses with water or solvent
- Safe on glass, metal and most plastic (except nylon)
- Safe on paint and powder coating (not nylon)
- Water free
- Gel consistency adheres to vertical surface, reduces spillage and waste
- Ideal for precision

## Other grades available

Digesil® NC	Standard Grade
Digesil® NC conc.	High capacity concentrate
Digesil® Gel	Thick grade for vertical surfaces

## Methods of use

**Important:** In all cases water must not be added to Digesil® Gel or be present on the surface to be cleaned as this will stop Digesil® Gel working.

Mix Digesil® Gel thoroughly before use. When applying from 25l containers a small amount of liquid will form on top of the gel during storage. The liquid can be easily redispersed by light mixing with a clean stirring stick. Mix thoroughly. Do not dilute or alter the product in any way.

- Remove heavy accumulations of adhesives or sealants using scrapers or other methods.
- Allow surface to dry thoroughly.
- Apply sufficient Digesil® Gel to produce a 3 mm to 6.5 mm layer over the stain or residue to be removed.
- Allow to retain 15 - 30 minutes or until residue softens, “lifts” or shows signs of dissolving. Digesil® Gel may be left on the surface for several hours to remove heavy buildup. Do not allow to dry.
- Remove Digesil® Gel and residues using pressure water rinsing equipment. Where such equipment cannot be used, brush the treated surface vigorously with a soft bristle brush and either warm water or a suitable cleaning solvent. Rinse thoroughly to ensure all residues of Digesil® Gel are removed from the surface.

**This is just one product  
from the Digesil® range**
