**Guardian[®] Fabric Protector
Protects fabric and carpet**

Guardian[®] Fabric Protector is a water based high performance coating utilising the latest polymer technology.

Guardian[®] Fabric Protector gives maximum protection against water and oil based stains including general dirt, oil, grease, coffee etc.

It will also prevent chewing gum adhering strongly to fabric/carpets.

Benefits of using Guardian[®] Fabric Protector

- Water based - for operator comfort
- Non-Hazardous - low health hazard
- Prevents staining and makes subsequent cleaning far easy
- Preserves new look of fabric/carpet
- Economical - high coverage rates
- Solvent free - environmentally considerate
- Aircures - no specially equipment requires

Chela: Innovative Cleaning Solutions and Technical Care

Chela Product Code: 1099

Application of Guardian[®] Fabric Protector

Guardian[®] Fabric Protector is designed to be used neat.

Areas of Use

Guardian[®] Fabric Protector can be used in many situations, for example:

- train seat covers
- carpets
- upholstery
- stairs
- bus seat covers
- clothing

All Surfaces

Always pre-test material for any changes in colour, shade or texture before fully treating an area. Thoroughly clean the area, if not new, using Vac Extract. Apply Guardian[®] Fabric Protector using a suitable pressure sprayer with an 8003 fan spray tip. 0.1 Litres (100mls) will treat 1m². Spray with an even stroke and then repeat in a crossing pattern until the correct amount has been applied. Brush product into carpet using a suitable pile brush. Allow to dry before allowing people to walk on the treated surfaces.

Extra Thick Pile

Where the pile is very thick the coverage will be much less than the above due to the thickness of the pile. Spray from side to side wetting the pile and brush in with a soft pile brush. Then spray again at ninety degrees to the first application and brush in again.

Full protection develops over a period of 24 to 72 hours.

Product Endorsements

Guardian[®] Fabric Protector has been extensively tested by the Chela Research laboratory.

It has also been independently shown that Guardian[®] Fabric Protector does not affect the flame retardency of the treated material.
