

CHELA BLUE TABS

A CONTROLLED RELEASE PRODUCT FOR CLEAN,
BACTERIA & MOULD FREE AIR

EASY MESS-FREE HANDLING

EFFECTIVE AGAINST LEGIONELLA

~

ADHERES STRONGLY TO THE CONDENSATION PAN

~

ONE TABLETS LASTS 3 TO 4 MONTHS

~

SOLID TABLET STRUCTURE MAKES FOR EASY HANDLING

~

SAFE FOR USE ON METAL, PAINT & PLASTICS

CHELA BLUE TAB

In every commercial cooling system (e.g. Fan coil unit, Air handling unit, Refrigerators), there is a condensate drain pan for collection of condensate water - The drain pan is prone to bacteria and mould growth as it is situated in a dark and damp environment.

Build up of slime as a result of bacteria growth and accumulation of dust and dirt eventually clogs the drain hole. This causes the condensate water to overflow, resulting in leaking cooling system. Since air is constantly carried across the drain pan, bacteria and mould spores can also be carried into the air stream, causing health problems to the occupants of the room.

Chela Blue Tab when used in a condensate drain pan prevents bacteria and mould growth in the drain pan and hence ensures clean, bacteria and mould free air. Moreover, usage of the Chela Blue Tab also prevents foul odours and leaking of water from the cooling system. The block uses controlled release technology, which enables consistent and long lasting performance. The Chela Blue Tab is designed to release effective levels of cleaning and disinfecting agents into the condensate water. Release of the active ingredients occurs by gradual dissolution of the block.

PRODUCT SPECIFICATION	
DIAMETER	43mm
HEIGHT	19mm
WEIGHT	30 Grams
APPEARANCE	Round block
DISINFECTANT	28.8%
COLOUR	Blue
pH 1% Solution	7.5

Easy-to-handle, 30 gram Chela Blue Tab

APPLICATION INSTRUCTIONS

1. When positioning Chela Blue Tab, make sure the air-conditioning system is switched off.
2. For optimum performance, clean the drain pan before applying the tablet
3. Place Chela Blue Tab at the opposite side of the drain hole.
4. The block will adhere to the base of the pan after 5 minutes.
5. The Chela Blue Tab gradually dissolves and eventually disappears.

APPLICATION INSTRUCTIONS

Size (Tonnage)	System Type	Usage (Units)
2-5	FCU	1
10-20	AHU	2
20-50	AHU	3

1. Each Chela Blue Tab will last 3 months in constantly operating systems.
2. Note: Product life depends on condensate volume, which is affected by climatic conditions hence this may vary.
3. This product is not suited for use in split unit air-conditioning system.

STORAGE

Store product in cool dry place in original packaging. Once removed from original packaging, product has to be used within 6 hours
